

# Your Permanent Solution to Temporary Cementation

**TempSpan® Provisional Cements** offer the perfect solution to conveniently cement your temporary restorations at prices that make sense. Featuring eugenol-free resin chemistry, both *TempSpan* provisional cements offer optimum bond strengths to prevent leakage and sensitivity but can be easily removed when needed without damaging the preparations or restoration. Auto-mix syringe delivery provides hassle-free, precise placement directly into the restoration with minimal waste. With *TempSpan* provisional cements you get all of the features that you want with the value that you've come to expect from Pentron Clinical.

**Two different versions** of *TempSpan* provisional cements are available to ensure there is a *TempSpan* cement to suit your provisional cementation needs.

## **NEW!** TempSpan® Transparent Temporary Cement

- > **Transparent** – ideal for the highly esthetic anterior zone
- > **Ideal retention** – securely retains provisional restorations and facilitates easy removal
- > **Non-eugenol** – ensures compatibility with resin-based permanent cements
- > **Auto-mix delivery** – provides accurate placement into the provisional with minimal waste
- > **Dual-Cure** – offers ideal working time with on command cure

## TempSpan® CMT Temporary Cement

- > **Resin-based** – eugenol-free formula for compatibility with resin-based permanent cements
- > **Optimized retention** – securely retains provisional restorations and facilitates easy removal
- > **Easy clean up** – gelled cement wipes cleanly away. Set cement peels away easily from preparation
- > **Auto-mix delivery** – provides accurate placement into the provisional with minimal waste
- > **Contains three desensitizers** – formulated with potassium nitrate, sodium fluoride, and calcium phosphate

## ...Meet the Remaining Members of the TempSpan® Family:

**TempSpan Dual-Cure Temporary Crown & Bridge Material** is a dual-cure composite available in 7 standard shades that can be light cured intra- and extra-orally.

**TempSpan Clear Matrix Material** is a transparent vinyl polysiloxane material that enables light activation of the dual cure *TempSpan* C&B material so the temporary is easily fabricated in the matrix.

**TempSpan Glaze** is designed to eliminate the time consuming step of polishing provisional restorations, creates a lustrous gloss on provisional restorations and is compatible with both halogen and LED curing lights.
